## ADDRESSING GENDER-BASED VIOLENCE

Gender-based violence (GBV) refers to any harmful act against an individual or group based upon their sexual or gender identity. Disproportionately affecting women and girls, GBV can include sexual, physical, mental and economic harm carried out in public or in private. Although GBV can occur at any point in a person's life, the risk increases considerably during humanitarian crises.

### GBV INCLUDES

 Sexual Assault	 Child, Early and Forced Marriages	 Denying Access to Economic Resources	 Sex Trafficking
 Intimate Partner Violence	 Female Genital Mutilation	 Psychological and Emotional Abuse	 Stalking

### THE PROBLEM

 <b>1 IN 3 WOMEN</b> experiences GBV in their lifetime.	<b>200 MILLION WOMEN</b> have experienced female genital mutilation or cutting. 
 Since the COVID-19 pandemic, <b>1 in 2 women</b> report that they or a woman they know have experienced violence.	 Globally, as many as <b>38% of murders of women</b> are committed by an <b>intimate partner</b> . 

### OUR APPROACH
